

## Crofters Bookcase (\$1,000.00)

This type of bookcase is called our Crofter's style. In England, a small family farm is called a "croft", and its owners or tenants are called "crofters". A Hardwood Artisans Crofter's Bookcase is built much like our Craftsman style bookcases, but here the sides are open, with graceful slats instead of solid filled-in panels. Also, the piece is backless, making these bookcases visually light and airy.

The tops overhang the sides, so these bookcases don't sit well side by side. But if you need a longer run of bookcases on your wall and like this Crofters style, we can build you sections that "gang" together to get you any length you want. Bring us your room dimensions and maybe a photo of your room and our sales staff will be glad to help you get just the right sized arrangement.

- Two inch overhands on each side.
- Custom sizes are available; contact us for more details.
