
Crofters Nightstand (\$1,000.00)

In England, a small family farm is called a "croft", and its owners or tenants are called "crofters". At Hardwood Artisans, the Crofter™ collection is built much like our Craftsman style, but the sides are open, with graceful slats instead of solid panels, making these pieces visually light and airy. One of the main characteristics of our Crofters pieces is the strong use of vertical spindles in the sides and backs. The general look is what many people might term "mission" style. Our Crofters nightstand features an open lower shelf, drawer on metal glides for full extension, solid 1" thick top, and leveling feet inside the legs for those less than perfect floors!
