

## Glasgow Cabinet (\$2,760.00)

By now, a credenza has become just about any piece of furniture that “serves” a room in general, whether this is a dining room, an office or conference room, or a living room. The spaces behind the doors are the proper size for most electronic gear.

You can purchase this piece online with art glass as shown in our photo gallery. Please note that the glass texture is notoriously difficult to capture well in a photograph. These images are as accurate as possible to present in digital imagery, but keep in mind, no representation of glass can ever be as true as the glass itself.

We can also build this piece with flat or beveled glass. Please call us for more information.
