
CD Bookcase (\$755.00)

If you like music, you are probably aware of how easy it is to accumulate a large quantity of CDs. If you don't have a place to keep these, they invariably end up all over the house, your car, and stuck randomly in drawers and cabinets. Then when you want to find a particular song or album, where do you look?

Our solution is to look no farther than this attractive CD Bookcase. You can keep up to 550 CDs arranged alphabetically, by style of music or by the color of the label - whatever works for you. This piece is designed specifically for CDs, but it also makes an attractive display case for smaller items.

This stand comes with 8 adjustable glass shelves and has one fixed wooden shelf. The style is simple enough to work with just about any room decor. We stock these in a variety of different woods and finishes. Availability depends on current stock.
