
Shinto Bench (\$675.00)

The Shinto bench is an Asian influenced design that has been created and recreated by dozens of companies. Co-owner Mark Gatterdam redesigned the Shinto bench to properly represent the way Hardwood Artisans believes furniture should be built: solid hardwood, no screws, no nails and lasts for generations.

This bench features the careful craftsmanship of through tenons with wedged keys. The keys are done in ebony wood as an additional accent. To top it off, a sculpted seat makes this piece a perfect balance of functional furniture and fine art.
