

Linnaea 4-Leg Table (\$3,065.00)

The organic lines of the legs on this table are so natural that they follow no mathematical formula. The leg curves in two directions, while tapering at the same time, giving it a “spider” effect. The legs and arched aprons curve in such a way so as to seemingly defy nature itself. An original design by Hardwood Artisans, this table gives an generously humble nod to the era of Eero Saarinen, Charles Eames, and George Nelson. Considered one of the most significant design periods in world history, these designs were created by thinking outside of the box.

- The 78" table seats up to 10 people.
- The 94" seats up to 12 people.
- The smaller extension includes two 18" leaves, and the larger extension includes three 16" leaves.
