

## Shinto Stool (\$725.00)

The Shinto stool is an Asian influenced design that has been created and recreated by dozens of companies. Co-owner Mark Gatterdam redesigned the Shinto stool to properly represent the way Hardwood Artisans believes furniture should be built: solid hardwood, no screws, no nails, to last for generations. These pieces feature careful craftsmanship of thru tenons and wedged keys commonly accented in ebony. To top it off, a sculpted seat makes this piece a perfect balance of functional furniture and fine art. If you prefer, add a back to the stool, supported by a steel brace in black. The design is also crafted in a shorter height which we call our Shinto bench. It is an ideal height to place in front of your bed or in any living room.

- Bar height and counter height available.
- With or without a back
