
Map Chest (\$2,740.00)

The original design of this coffee table was for, well, maps, for a cartographer, otherwise known as a map collector. We took an attractive design and made a few adjustments. This functional and fun trompe-l'oeil piece has two drawers that look like three—one shallow for remote controls and other living room gizmos, and the other one deeper for extra pillows, serving trays or whatever else might be handy to have nearby.

- Designed to compliment several of our living room collections.
- Sizes are customizable.
- Contrasting wood panels are available as a custom option.
