

Craftsman TV Console (\$3,355.00)

The current flat plasma or LCD monitors, with their wide (letterbox) ratio screens and their unobtrusive (and thin) black frames, can be pretty much left alone if they are displayed on top of a correctly sized and nicely styled furniture piece.

The Craftsman TV Console features six drawers on metal glides (for full extension) for your CD's and DVD's. There are two glass adjustable shelves behind the frame and glass panel doors. The back is left off the center space for ventilation.
