

Motus Desk (\$3,776.00)

The word "Motus" means movement in Latin - movement is exactly what this desk does. It was crafted with glides typically used on airplanes for their load-weight and durability. These glides allow the two boxes you see under the desk to slide out and create a larger work area for the user. Each set of glides can hold up to 100 pounds of force which makes them perfect for holding your files, and other desk accessories.

The desk features an organic kidney shape to wrap around the user for ultimate comfort.

- The file drawer is a "front-on" file.
- Custom handmade pulls.
- Features a bookcase with a fixed shelf as the rear support.
- Two pencil/paper drawers.
