

Butterfly Table (\$4,140.00)

The term “butterfly table” refers to a table where a hinged leaf is stored inside the table. The leaf is on a pivot and when the table is opened, the leaf can be rotated into place. Very Cool. This table has our Linnaea base with a 45½” wide by 68” long top in the closed position.

The butterfly leaf is 22½” wide so the table becomes 68” square when open. The ¾” thick solid top has the typical boat shape and penciled edge of our Linnaea line. In the closed position, the is a nice 6-person table. Open it is a generous 8-person table. (You could fit 10 tightly.) With a square table all of the people can easily see all the others, which nicely facilitates conversation.
